

SUBSTANCE ABUSE TREATMENT FACT SHEET

Massachusetts Department of Public Health, Bureau of Substance Abuse Services

This fact sheet contains information about the impact of alcohol and other drug use in the Fourth Berkshire Representative District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2002.

Residents of Fourth Berkshire Representative District

Characteristics of Admissions

In FY 2002 there were 124,539 admissions to licensed substance abuse treatment services in all of Massachusetts; 2% (2,519) of these admissions reside in the Fourth Berkshire Representative District. 2% (57) of admissions from the Fourth Berkshire Representative District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2002, admissions to all residential and outpatient substance abuse treatment services from the Fourth Berkshire Representative District reported the following characteristics:

- 69% were male and 31% were female.
- 52% were between the ages of 30-49.
- 87% were white non-Latino, 6% were black non-Latino, 3% were Latino, and 3% were other racial categories.
- 59% were never married, 13% were married, and 28% reported not to be married now.
- 25% had less than high school education, 51% completed high school, and 25% had more than high school education.
- 32% were employed.
- 12% were homeless.
- 42% had prior mental health treatment.

Primary Substance of Use

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Fourth Berkshire Representative District.

Table 1					
Primary Drug by District and State FY 2002					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	58%	13%	10%	3%	10%
State	45%	37%	6%	4%	3%

Substances Used in Past Year

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, as well as the prevalence of injection drug users (or IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

Table 2 Annual Admissions by Substance Used FY 1995 – FY 2002 Fourth Berkshire Representative District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
FY '95	1,698	1,527	612	311	466	108	78
FY '96	1,550	1,361	623	263	421	134	95
FY '97	1,624	1,408	568	315	362	184	112
FY '98	2,409	2,035	901	456	594	292	155
FY '99	2,460	2,149	987	545	666	343	224
FY '00	2,527	2,200	1,029	555	622	423	283
FY '01	2,460	2,093	1,017	518	594	413	222
FY '02	2,519	2,159	1,080	614	716	493	230

Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the Fourth Berkshire Representative District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
